

Lisa Cargeeg
Physiotherapist

Lisa has an extensive background as a physiotherapist working with children at the State Child development centre, Princess Margaret Hospital and in the pre-term playgroups at King Edward Memorial hospital. Lisa is committed to the professional development of physiotherapists and works for Curtin University, supervising students on their paediatric placement at the State Child Development centre.

Lisa is also a member of the national Paediatric branch of the Australian Physiotherapy Association.

Lisa has been with Skillbuilders since its inception in 1996 and she has been highly successful in her work with children from babies to adolescents, experiencing a wide range of conditions.

» Kids On The Move

- Professional services
- Educational resources

Skillbuilders was founded in 1995 as a private WA-owned allied health service provider specialising in the delivery of multidisciplinary treatment and therapy for children. In addition to its exceptional team of highly qualified specialists, Skillbuilders also sells a range of top quality therapy and educational resources and equipment across Australia.

SKILLBUILDERS

Building Kids' Skills for Living and Learning

PHYSIOTHERAPY SERVICES AT SKILLBUILDERS' INCLUDE:

- Detailed assessment of strength, muscle tone and motor skills
- Tailored treatment devised and negotiated with parents
- Individually designed therapy programmes for each child
- Practical supportive advice given to parents and carers, including education on play skills to enhance child's development
- Therapy options are individual sessions, group programmes or home programmes

WHEN TO SEEK PHYSIOTHERAPY

Through games and exercises, physiotherapists can help babies and children learn to improve the quality of their movement.

Your child will benefit if any of the following are present;

- Delayed development from birth to adolescence
- Motor co-ordination problems
- Specific conditions, eg. Cerebral palsy
- Positional turning of the head, torticollis or plagiocephaly in babies
- Feeding difficulties
- Musculo-skeletal problems such as postural problems, unusual walking or running patterns, toe-walking
- Gross motor skill delays associated with Autism / Aspergers
- Poor fitness
- Overweight or obesity
